

Accept no substitutes! The AMS Safety Slide® patent has apparently been ignored and there are now US based and international companies copying our tried and true Safety Slides. AMS Safety Slides found in the stores should be Orange for 2011 or Blue since 2008, 2009 and 2010. Originally we did produce black safety slides, but EVERY slide produced by AMS Bowfishing is stamped with our patent number for identification. AMS Bowfishing does sell our Safety Slides to other companies to install on their arrows so that all bowfishermen can benefit by using our slides. Please look for our name on the packaging or definitely our patent number stamped directly on the slides to ensure you have **our** quality tested product. If you are unsure of the origination of the product, ask the retailer you are purchasing from.

The copied slides in question are black, with no patent number on them. They are manufactured overseas. All equipment made or assembled by AMS Bowfishing is made in the USA. The copied slides do not slide nicely up and down the arrow shaft in most cases. The shock pad seems to be made of the same material as the copied slide. As of now, we have received calls that the copied black slides are failing at a rate of 100%.

AMS Bowfishing is currently evaluating a legal response.

We Thank You for your support!
